- Trained in customer service
- Able to use various machinery for metal fabrication such as Lathes, vertical mills, and CNC
- Trained to use machinery such as pump jacks and power jacks
- Technology enthusiast, love learning how systems of all kinds work on a deeper level (software & hardware)

Highlights of technical Skills

- Logical, organised, and methodical programmer who's been refining these skills since grade 7
- OS: Mac, Linux, Kali Linux, Windows.
- Well studied on modern blockchain technologies
- Knowledgeable in Git, C/C++/C#, Java OOP, Python, Lua, HTML, CSS, and Excel VBA. Also very well versed in all useful data structures and their situational O notations
- Machine learning enthusiast with a strong understanding of the history and contents of the mathematical models used towards the application of cutting edge technologies such as: OpenCV, TensorFlo, Keras, Tesseract, SAS, ONNX, Neo4j and enjoy learning more every day.

Work Experience

CanCap Management Inc.

-Funding Analyst: April 7th 2021-Current

- I review the accuracy of loan documents received digitally from automotive dealer partners across the country in comparison to the loan approval and company policies. Done by leveraging an internal workflow platform.
- I Interact with automotive dealer partners, in writing and verbally, regarding discrepancies in document detail, calculations, loan terms and approval conditions.
- Accurate and timely data entry of loan details to ensure successful onboarding of the client's loan.
- I work in a face paced environment to achieve departmental service level goals. Expected to provide strong customer service by answering inbound calls from dealer partners who require assistance in fulfilling loan documentation requirements or general inquiries.
- Balance attention and prioritisation between new files and follow up on outstanding files.
- Display a commitment towards teamwork and collaboration.

Rothsay-A Division of Darling International Canada Inc

880 ON-5, Dundas, ON L9H 5E2

-General Labourer: June 2018-January 2021

Two consecutive full-time summer terms including one winter break term

- As a summer worker for this company, I was responsible for any general labour work required. This work varied depending on what I was asked to do
- Typically worked in the wash bay where I, along with my coworkers, were responsible for ensuring all trucks in the yard were maintained in a presentable condition according to company standards
- Had to maintain flexible hours and work overtime according to Instructions from managers
- Would on occasion be sent out with trucking fleet workers where I'd work with them to collect product while maintaining customer relations

Fortinos

102 Hamilton Regional Rd 8, Stoney Creek, ON

Quit May 2019: Around 3 years

- I reorganised and stocked store products

- Was responsible for creating displays targeted at selling ongoing store specials
- I'm trained on how to use various machinery such as power jacks and pump jacks
- Responsible for dealing with customers through an energetic yet professional attitude
- Always adhere to a specific dress code
- Responsible for any general maintenance required around the store including the responsibility of maintaining a clean environment for a positive shopping environment for all customers

Volunteer Experience

Helper at a stand for the Winona peach fest

1468 Hwy 8, Winona, ON

August 27th, 2015

- Shucked and prepared corn to be cooked and sold
- Helped with anything else requested of me

Extra Curricular

Highschool Robotics Alumni

200 Dewitt Rd, Hamilton, ON L8E 4S7

- A proud former member of the Heavily team-oriented team 2056
- A world-renowned team that prides itself on excellence. Required a heavy dedication of time which developed my effective planning skills at a young age.
- Spent most of my contribution to the programming team where we'd apply WPILib C++ to various control systems such as actuators, sensors, and motors as needed.
- Used PID(Proportional-Integral-Derivative) feedback control to then program autonomous features to the robot. This learning experience of taking math straight out of a textbook and applying it directly to a machine spearheaded my studies in computer sciences at a university level.
- Also contributed towards the fabrication of the various aluminum/wood parts for both the robot and the game field, along with learning how to effectively install hardware and wiring by scratch

Education

Orchard Park Secondary School, Stoney Creek ON

University level classes

Honour student

Successfully obtained O.S.S.D

Wilfrid Laurier University, Waterloo ON

Currently studying towards my BSc of computer sciences for my second year (four year program)

Attempting a minor in Econimics
